DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: it would appear that the description of Fig. 8 on page 3 is incorrect. The description indicates that the X axis is the time axis while the figure appears to describe the response in the frequency domain and not in the time domain. Additionally the descriptions of Fig. 1 and Fig. 2 on page 7, lines 29-32, do not appear to actually describe those figures.

Appropriate correction is required.

Drawings

Some of the drawings, Figs. 1, 3, 8, 13 and 14 to some degree, are too indistinct and need to be corrected for this.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9,10 and 17 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims all cite a step "b" which has no proper antecedent basis in the claims on which these depend.

Allowable Subject Matter

Claims 8, 11-16 and 18-23 are allowed.

Art Unit: 2834

Claims 9, 10 and 17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: the prior art fails to show or fairly suggest a structure or methodology associated with it which includes an apparatus for sensing a deviation whereby one or more bands of amorphous and/or nano-crystalline material, magnetically biased, is surrounded by one or more multi-turn coils, and which structure is mounted such that it is freely suspended. Detection of a magnetic flow change within the coil indicates such a deviation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
